

BL10

Smart Bike-sharing GPS Lock

GPS/WIFI/LBS Positioning

Faster searching & locating speed realizes more accurate bike locating

Geo-fence

Create virtual barrier to define geographical boundaries

Long battery life

10000mAh battery and intelligent power management ensure 45 days work time

Powered by solar energy

Mono-crystalline silicon solar panels provide solar-energy conversion

Stable & durable hardware

100,000 locking and unlocking tests witness its stable performance

IPX6 water proof

Able to withstand inclement weather conditions

OTA

Easy to update the GPS lock remotely

Efficient unlocking

GPRS & BLE technology ensures efficient and reliable unlocking

Application

Public places

Campus

National park
